ECG: Successful History in Pharmaceutical Developments

Over 25 years of success

In this prestigious project, ECG and Orascom Construction Industries collaborate to construct the new state-of-the-art pharmaceutical factory of Horus Pharmaceutical Industries at Polaris International Industrial Park, 6th of October City.

The pharmaceutical plant will be developed over a land area of 125,000 m² which will make it the biggest pharmaceutical plant in Egypt and MENA region. The historical building and traditional local materials such as limestone and glass characterize the design. This will help the project to have a durable weather resistant massive wall construction, good thermal internal, warm natural color which creates a harmony with the surroundings.

The factory will have main production area which includes solid production, sterile production and penicillin production and auxiliary buildings. The project's development will be completed by the year 2021 over 3 phases aiming to achieve an annual solid production capacity of 2.5 billion tablet and 1.38 billion capsules and sterile production of 126 million ampoules (<10 ml) and 2.2 million ampoules (<60 ml).

ECG Advances in ENR Rankings

For the fourth year running ECG advance in the ENR ranking Climbing up from 151 in 2007, 149 in 2008, 135 in 2009, ECG ranked 133 in the Top 200 International Design Firms 2010 list published by Engineering News Record (ENR); the distinguished, globally circulated magazine with ratings and analysis profoundly respected across international design and engineering circles.

Deemed a triumphant international victory for ECG, the firm has climbed the ENR ranking ladder outperforming international engineering, architectural, and engineering design firms. ENR statistical analysis underscores ECG's growing potential, as an Architect-Engineer, to reap substantial revenue flows from thriving Middle East and North Africa markets especially in the general buildings; power; water supply/ wastewater network; and industrial/ petrochemical sectors

Reopening of ECG branch in Syria

With the company's continuous success in Syria and the expansion of its projects, ECG announced the reopening of its Syrian branch in the Levant region and the fifth in the middle east.

Crédit Agricole Egypt (CAE) New Head Office Complex, New Cairo, Egypt

Designed to reach the required qualifications for LEED Silver Level

Crédit Agricole Egypt (CAE) New Head Office Complex is planned to accommodate headquarters staff from different locations currently existing in central Cairo locations.

The building emerges from an oasis of palm trees. The strong, regular geometry of the building is contrasted by irregular shapes of the surrounding landscape elements, namely, the palm trees and large boulders. The design intelligently uses the project site's natural slope, creating a semi-open garden floor.

To satisfy the needs of this particular project in terms of accurate modeling and coordination among different disciplines, ECG has used Revit BIM Package 2010 throughout the design process, starting from the schematic design all through the design stages.

Cordoba Hills, Syria

The Cordoba Hills Project is being developed as a self-contained city, designed to nurture healthy family living and provide a unique lifestyle for all its residents. The residential development will be an integrated compound, providing first-class facilities to ensure harmonious and comfortable daily life.

Cordoba Hills is ideally located and surrounded by an environmentally rich landscape of vegetation that makes up more than 60% of the land. Cordoba Hills is spread over 1.3 million m² of outstanding natural beauty.

The Cordoba Hills project is characterized by clusters of buildings. Comprising 800 luxurious villas all distributed over twenty clusters; Cordoba Hills ensures its residents the privacy and independency they seek.

To accommodate diverse tastes, Cordoba Hills offers several villa types for residents to choose from: Spanish, colonial French, Mexican, and Moroccan. The exceptional layout of every home ensures the best use of interior space, regardless of which villa type or design is chosen. Each home will exist in harmony with its outside surroundings, providing breathtaking scenery as well as absolute privacy for all residents.

ECG's scope of work involves the review of master plan, review of tender documents, tender action and construction management and supervision.

ECG 2010 General Assembly

On the 12th of July 2010, ECG held its 2010 general assembly at the Fairmont Hotel Heliopolis, which was followed by a magnificent celebration in recognition of another successful year. Attended by more than 1000 of ECG employees, the ceremony started by the opening speech of Eng. Mohamed Abdel Monem (Senior Vice President), followed by the speech of Eng. Sami AbdelKawi (Co-Founder and Senior Advisor), Eng. Amr Allouba (Chairman) and the speech of Eng. Ahmed El Sayed (President and CEO).

Familiarizing the attendees with the company's achievements in 2009, the engineering division heads gave a series of presentations covering all engineering sectors showing the updated status of the 66 new mega projects ECG was awarded in 2009 and the 56 new projects awarded in the first 2 quarters of 2010. The four-branch regional managers were keen to attend the ceremony and gave a brief presentation on their projects and success in the regional market making ECG one of the top Engineering firms in the MENA region.

At the end of the ceremony, ECG held a ceremony memorizing silver jubilee employees in recognition of their dedication, loyalty and hard work.
