HVAC  
Interior design  
Landscape  
Mechanical  
Structural

ABC bank has acquired a skeleton building that was originally designed to function as an administrative building. Thus, the original building design shall be developed to accommodate the bank requirements.

With a total built-up area of around 12,700 m<sup>2</sup>, the newly designed building will consist of the following:

- 2-level basement: cash centre, archives, technical rooms, general services, in addition to parking areas (around 260 cars);

- Ground floor: reception & lounge, meeting rooms and cafeteria; and
- 6 typical floors: administration & staff offices, as well as prayer rooms.
