

Edfu Pulp Writing and Printing Paper Co.

Client

Egyptian Sugar & Integrated Industries (SIIC)

Scope of Work

Detailed design

Location

Edfu, Egypt

Types of Activities

Industrial

SIIC has operated a plant since 1963 to produce unbleached pulp paper in Edfu, Upper Egypt.

With a view to increasing the company's profitability, a new plant was constructed in the same site of the old pulp writing and printing paper plant.

SIIC assigned ECG to design and provide detailed engineering for installing a huge machine in a new plant and the process tie-in lines between the existing pulp plant and the new plant; encompassing piping layout, pipe routing, tie-in at both sides, pipe racks, pipe supports, piping isometrics and piping stress analysis.
