

Design Services as Permitting Consultant - Doha Metro - Major Stations

Client

Mott Macdonald

Scope of Work

Architect of Record
Design Review

Location

Qatar

Types of Activities

Architectural
Fire Protection and Life Safety

The Doha Metro was procured through a number of construction packages. Qatar Railways Company (the Employer) has engaged in a joint venture (Samsung C&T, OHL and Qatar Building Company) to execute Design and Build Package 5. The Design and Build Consultant, Mott Macdonald, assigned ECG the professional responsibility as The Architect of Record.

Package 5 includes Msheireb and Education City Stations. Msheireb station is a large underground interchange located at the centre of Doha Metro network; adjacent to and partly below the Msheireb

Properties Downtown Doha at the intersection of Al-Diwan and Wadi Msheireb streets, where the station provides the interchange between the Gold, Red and Green Lines. Education City station is an at-grade main station on the Green Line.

ECG scope of works covers design review, preparation of drawings and documentation for building permits application, and follow up and finalise building permits.
