

4 Network Nodes in The New Administrative Capital

Client

Administrative Capital for Urban Development (ACUD)

Scope of Work

Concept Design
Detailed Design
Tender Documents
Tender Action
Construction Management
Construction Supervision

Location

New Admin. Capital, Egypt

Types of Activities

Architectural
Civil
Communications and Security Systems
Electrical
HVAC
Landscape
Mechanical
Roads
Structural
Urban Design

The project includes 4 Network Nodes in the New Administrative Capital as follows:

- Network Node NN4 stretches over a land area of 28,906 m² and consists of administrative building (A) of ACUD, building B for telecommunication companies, and building C type 2 for the data center.
- Network Node NN5 stretches over a land area of 32,096 m² and consists of administrative building A of ACUD, building B for telecommunication companies, and building C type 2 for the data center.
- Network Node NN7 stretches over a land area of 31,939 m² and consists of administrative building A of ACUD, building B for telecommunication companies, and building C type 1 for the data center.

- Network Node NN8 stretches over a land area of 37,921 m² and consists of administrative building A of ACUD, building B for telecommunication companies, and building C type 1 for the data center.

The BUA of the administrative building A of ACUD is 4,100 m², building B for telecommunication companies is 9,250 m², building C type 1 (855 racks) is 11,000 m², and building C type 2 (1,431 racks) is 15,200 m².
