

# Design of Pedestrian Bridges

**Client**

Al-Jaber

**Scope of Work**

Detailed Design

**Location**

Abu Dhabi, UAE

**Types of Activities**

Structural

ECG was awarded the design of 9 pedestrian bridges at various locations in Abu Dhabi.

The structural system is composed of steel trusses. All bridges are double spanned, varying between 28 m and 44 m, the sides are aluminum clad and covered with sandwich panel roof.
