Tal Moreeb Liwa Festivals Project 2024 aims to deliver a memorable entertainment experience during the cooler months of the year. This phase of the project focuses on enhancing the RV area, covering approximately 446,600 m², to accommodate 800 Class A and Class B RVs. The main roundabout will be upgraded to feature a state-of-the-art sculpture, while additional surface parking will be created to accommodate over 1,300 vehicles. The food

truck zone will be transformed into an entertainment hub for dune projections, fireworks displays, and stargazing activities. Moreover, two existing buildings will be reclad and adorned with artwork to serve as the festival background.
