Construction Supervision and Management

Location

Smart Village - 6th of October City - Egypt

Types of Activities

Architecture

Civil

Electrical

HVAC

Mechanical

Structures

Project B118 consists of three buildings (B1, B2, and B3) with a total area of 26,870 m². Etisalat Misr occupies the existing B3 building skeleton, which comprises a ground floor, three typical floors, a roof, two basement floors, and spine corridors, while the other buildings remain as core and shell. The project includes a total of **380** racks serving three NOCs, with a data center IT load of **1,500** kW. Additionally, the landscape design allocates a distinct landscape for each building (B1, B2, and B3).
